ANNOUNCEMENTS (Continued)

Annual Study on Trends in Soviet Foreign Trade

The survey is nearing completion and drafts will be sent to Departments of State and Commerce by 18 August.

China Trade Paper

T/TF has ready for re-submission to Ch/E a second finished draft of the preliminary survey of China's 1964 trade, [which is to be published as an ORR report but] which is being done at the request of the EIC. This paper is a comprehensive analysis, and, unless the forthcoming Soviet and Free World 1964 trade statistics contain real surprises, this so-called preliminary survey will, in fact, become our contribution to the final EIC-R16 paper. Only a few late commodity trade returns will have to be added to it between now and the R16 publication date.

Other Business:

Sufficient copies of the Biweekly Questionnaire are available if you wish to distribute them at the meeting. (Minnie has copies)
